# NEW MEXICO HAS A RECORD COAL YEAR

Gains 337,810 Tons in Quan- EL PASO tity and \$250,594 in Value in Year.

Washington, D. C. Dec. 20 .- The United States geological survey reports that the total production of coal in New Mexico in 1909 was 2,805,747 short tons having a spot value of \$3,619,347, as having a spot value of \$2,619,347, as compared with 2,467,927 short tons, valued at \$3,368,753, in 1998—a gain of 27,810 tons, or 13.7 percent in quantity, and of \$250,594. or 7.4 percent, in value. New Mexico, like Montana, exhibited the effects of the revival in the metal mining industry in 1909 by a record breaking production of coal, but, unlike tast of Montana, the product of New Mexico increased less in value than in quality.

in quality.

The increases in output were made in Colfax and McKinley counties, in which are located, respectively, the Raton and Gallup fields. The production in all the other counties decreased, except in Lincoln county, which made a small gain.

The average price per ton declined from \$1.37 in 1908 to \$1.29 in 1909, the decline having been due to the lower in quality. decline having been due to the lower value of the product of Colfax county. About 25 percent of the coal produced in this county is made into coke, most

in this county is made into coke, most of which is shipped to manufacturers whose interests are allied with those of the coal and coke producers.

The value placed on the coal charged into the ovens is wholly arbitrary and the decline in price may be more ap-

Transportation, Labor and Accidents. In 1909, as in 1908, there was an ample supply of cars, there was no inter-ruption of business by labor troubles and the supply of labor was adequate. More satisfactory than these, however, was the fewer number of accidents, not withstanding the increased production. The United States coal mining law,

governs mining operations in New Mexico, does not require the re-porting of non-fatal accidents, and the statistics of accidents as compiled by Jo E. Sheridan, territorial mine inspector, include only those that are at-lended with fatal results. Mr. Sheridar reports that in 1909 there were 13 fatal accidents—a decrease of 16 as compar-ed with 1908. Of these/13 fatal accidents nine were due to falls of roof or

The quantity of coal mined for each life lost in 1999 was 215,827 short tons, more than double that of the preceding year. During the 15 years that statistics of accidents have been compiled for the territory the fatal accidents have reached a total of 223. In this period there have only been four years, 1895, 1899, 1901 and 1907, in which there were any deaths due to explosions of either gas or dust.

The total number of deaths from explosions in the four years was 43, and 24 of them occurred in 1895, so that in the last 14 years only 19 deaths have been due to this cause, while 108 have been due to falls of roof and coal.

Total Production.

The first record of coal production in New Mexico is contained in the initial ty feet of 60 peso ore has been opened issue of the geological survey's c qual up by the San Siavador mine in the New Mexico is contained in the initial issue of the geological survey's cauliful ty feet of 60 peso ore has been opened up by the San Siavador mine in the up by the San Siavador mine in the up by the San Siavador mine in the Manzanal mountains. The ore has been encountered in a drift on the 70 foot evel, it being penetrated for 30 feet. The ore does not have to be shot, as it is loose enough to be picked down. The ore will soon be shipped.

The regular annual meeting of the cadena de Cobre Mining company will

The total production from 1882 to the be held in Bisbee on January 5. The close of 1909 amounted to 27,599,116 company is preparing to resume operashort tons, which, including mining and tions as all litigations have been other losses, represents a total exhaus-tion of about 41,400,000 tons. The

Quantity of Coal Minable. According to the estimate of M. R. of Carbo, in the Carnero mountains, Campbell, of the United States geological survey, the original coal supply of tunnel which is being driven to catch New Mexico was 163,780,000,000 tons, so the ledge. the exhaustion to the end of 1909 represents approximately 0.02 percent of the original supply.

## BIG MINE MERGER HAS BEEN CLOSED

Calumet-Arizona and Superior-Pittsburg Deal Effective April 1.

The directors of the Calumet & Aripany, operating in the San Javier diszona, Superior & Pittsburg Copper companies at the meeting in Chicago, completed plans for the consolidation of the two big mining concerns.

The merger plans provide for an exchange of stock on the basis of three and one-half shares of Superior & Pittsburg for one of Calumet & Arizona. The shares have a par value of \$10 each. The consolidated companies will form one of the largest operating in the Arizona copper fields.

The Calumet & Arizona is at pres-

ent capitalized at \$2,500,000, with \$2,-600 000 of stock outstanding. The capital will be increased to \$6,500,000 to provide stock to be exchanged for Superior & Pittsburg shares. The Superior & Pittsburg is capital-

the Sonora Copper company which will be erected at Cobre Grande, near Noria, ized at \$20,000,000 with \$14,727,000 of stock outstanding. The Superior & Pitisburg was formed by a consoli-dation of the Calumet & Pittsburg, ters at Guaymas and Fundicion, has the Lake Superior & Pittsburg, the acquired the concession awarded A. H. Pittsburg & Duluth, and the Junction companies about three years ago, and control about 1400 acres in the Bisbee (Arizona) copper fields. The Hermosillo, have been taken over by the Hermosillo Copper company, which Calumet & Arizona controls a smaller acreage, but owns a large smelting has property adjacent. The company plant at Douglas, Arizona, with a canow has 1395 acres of mining lands. New machinery has been installed and pacity for handling 3500 tons of ore includes a churn drill with a 1000 foot

Each company has been producing about 2,000,000 pounds of copper a month, and the output will be largely increased after the merger and when there is a better market for copper The merger plan will be effective April 1 and in the meantime dividends declared by the Calumet & Arizona will be shared pro rata.
